

# Premium Hardwax Care

## 1 PRODUCT DESCRIPTION

Water-based care product on a wax basis for the regular visual refreshing of hard-wax oiled wood and cork floors.

- Protects the floor against abrasion and the wood against water.
- Ready to use.
- Wipe-proof, can be mopped after drying.
- Matt.

## 2 SUITABLE FOR

For refreshing oxidative oiled wood and parquet floors, as well as oiled cork floors and oiled OSB, especially surfaces oiled with **Dr. Schutz Premium Hardwax Oil +**. Also suitable for industrially pre-oiled surfaces with high grain enhancement. In the case of UV-oiled surfaces we recommend testing beforehand. Not suitable for waterbased sealed surfaces without grain enhancement.

## 3 APPLICATION

Clean the floor well and allow to dry. Shake up **Dr. Schutz Hardwax Care** thoroughly. Apply thinly and evenly in undiluted application as complete care with a soft, fluff-free cloth, or with the polish applicator, free of streaks in the direction of the wood grain. The product is self-hardening and needs no polishing.

Please note:

- During application avoid strong sunlight and draughts, turn off floor heating beforehand.
- Temperature of floor and material must not fall below +15°C during application and drying time.
- It is also possible to apply the product in the framework of maintenance cleaning, diluted in a ration of 1:100 in water, using a mop.
- The build-up of too many layers of care product is to be avoided. By strip-cleaning with euku intensiv layers of care product can be removed.
- Polishing with a high-speed machine after drying is possible.
- Clean tools and implements with water.

The protection of the floor remains preserved if **Dr. Schutz Hardwax Care** is regularly applied after strip-cleaning. The care cycle is dependent on the degree of wear and tear:

- Slightly used floors (e.g. in living and bedrooms, office rooms without public access) about once or twice a year, as required.
- Medium used floors (e.g. in corridors, on staircases, in office rooms with public access) about every 3 to 6 months, frequently used areas also more often.
- Especially heavily frequented floors (e.g. in pubs, restaurants, shops, department stores, schools, or in the case of dance-floors) every 4 to 8 weeks, or more often.

## 4 COVERAGE

## Premium Hardwax Care

50 m<sup>2</sup> (20 ml/m<sup>2</sup>)

### 5 CURING

When using the product undiluted as complete care, allow the area to dry out well before use (12 hours, ideally overnight, at 23 °C, 50% rel. air humidity, ventilation).

Low temperatures, high humidity and poor ventilation can prolong the drying time substantially.

### 6 MAINTENANCE

### 7 STORAGE

Store in a cool, dry place in the closed original canister. Keeps for at least 24 months in unopened original canister from the date of manufacture. Keep locked up and out of the reach of children.

### 8 TECHNICAL DATA

Contains substances: water, polyacrylat, glycoether, silicic acids, waxes, additives. Contains a mixture of: 5-chlorine-2-methyl-2H-isothiazol-3-on and 2-methyl-2H-isothiazol-3-on. May produce an allergic reaction.

voc (g/l) 49 (ISO11890) / GISCODE: GE10

ADR/RID: not a dangerous good.

CLP: no obligation to be labelled as hazardous.

Even when using low-pollution products, the usual safety measures are to be observed. Keep out of the reach of children. Completely emptied canisters can be disposed of in domestic waste, or taken to the recycling centre.

### 9 SPECIAL NOTES

- When applying to UV-sealed pre-finished wood floors, we recommend testing beforehand for adhesion and wetting. The pre-finished wooden floor must have a factory-applied edge-impregnation, or have its joints impregnated after being laid to prevent water penetration.
- Not suitable to impregnated-oiled surfaces. For these we recommend euku refresher.
- euku wax easily forms layers. In the case of excessive layers of care product it is possible to strip-clean the floor with Intensive Cleaner for Parquet&Corc.
